## TECHNICAL INFORMATION SHEET NUMBER 15

October 2014

### ENGLAND SQUASH RACKETBALL BALLS SPECIFICATION AND OFFICIAL APPROVAL PROCESS

Racketball is widely recognised as the fastest growing racket sport in England. As a sport it positively complements squash and is playing a vital role in raising the profile and increasing the usage of squash facilities throughout the country.

In recent months, England Squash has invested a great deal of time in marketing and developing a wide range of racketball activities, which we see as a fantastic opportunity for future growth.

To meet the demands of all player abilities, we have decided to recommend two types of ball;

1. Blue ball (Recreational) – for all players below premier league standard, this is the recommended ball for general use for the majority of racketball players
2. Black ball (Competition) – elite players, premier leagues and above

It is our intention to ensure consistency in the quality of these balls and to encourage everyone who plays the sport to use a ball that best suits their standard of play and enhances their enjoyment of the sport.
