

## TECHNICAL INFORMATION SHEET NUMBER 1

July 2015

### THE APPROVAL SCHEME & APPROVED LIST OF CONTRACTORS AND SUPPLIERS

#### BACKGROUND

The England Squash Approval Scheme is designed to help both the user and supplier of squash related products. England Squash assesses systems, products and materials that are offered for use in squash courts by the industry. Manufacturers welcome Governing Body evaluation of products and an indication of those which are considered suitable for squash.

#### PROCEDURE

1. Products submitted for inclusion in The England Squash Approval Scheme are assessed over a minimum period of 6 to 12 months so that they receive a full season's use. If at the end of that period both the client and the England Squash Technical Services Committee are satisfied that the candidate systems, product and materials have performed satisfactorily then England Squash's Approval is normally granted.
2. The criteria used to assess the candidate products includes:
  - a. ease of installation
  - b. suitable performance characteristics
  - c. reliability
  - d. ease of maintenance
  - e. efficiency of back-up service
  - f. that the company is run in a businesslike and commercially acceptable manner.
3. Manufacturers of Approved systems, products and materials are permitted to use the England Squash name and logo in their literature, following which, England Squash will inform enquirers about products on the Approved List. In this way an enquirer knows that if a product has England Squash Approval then the likelihood is that it will be safe to use (provided the circumstances are satisfactory). On the other hand the manufacturer knows that if his product falls short of the required performance then not only will England Squash expect a prompt and effective reaction to complaints, but also if complaints become too frequent, then England Squash Approval will be reviewed and possibly withdrawn. The England Squash Approval Scheme assists England Squash in establishing and maintaining close and harmonious links with the squash building/supplying industry.

## **TECHNICAL INFORMATION SHEET NUMBER 1**

### **THE COST OF ENGLAND SQUASH APPROVAL**

4. Candidate systems, products and materials must be examined and assessed for performance. This requires on site visits from members of the England Squash Technical Services Committee and such visits must be fully financed. Therefore, initial costs to manufacturers under the England Squash Approval Scheme cover all England Squash's professional fees and expenses.
5. Once England Squash Approval has been granted, the manufacturer is given the opportunity to use the England Squash name and logo in their literature. Also, the manufacturers contact details will appear in the appropriate England Squash Technical Information Sheet and the England Squash Court Maintenance Manual, both of which are widely circulated. The contact details for companies appearing on the England Squash approved contractors, maintenance companies and suppliers can be found on the England Squash website, [www.englandsquash.com](http://www.englandsquash.com)

### **ENGLAND SQUASH STANDARDS**

6. England Squash has over 4500 courts in England on its files. The regular exchange of information between England Squash and court locations throughout England on technical and development matters enables England Squash to constantly to keep right up to date with new developments in the industry. Because the capital cost of building a squash court is so proportionately large in comparison with most other sports facilities, England Squash maintains a very high standard of technical requirement. Building and dimensional tolerances of the court are very small. There is hardly any technical problem upon which The England Squash Technical Services has not given advice. If England Squash come across a problem, which they have not previously experienced, it will be researched and a satisfactory solution obtained. The most important advantage of seeking The England Squash Technical Service's advice is that it will always be experienced and impartial.

### **THE ENGLAND SQUASH APPROVED PRODUCTS**

7. For contact details of England Squash approved products, please refer to the attached list. This list is subject to amendment as new products are added. Please contact the England Squash office to be sure that you have the latest details.

## TECHNICAL INFORMATION SHEET NUMBER 1

July 2015

### THE ENGLAND SQUASH APPROVAL SCHEME

#### SYSTEMS, PRODUCTS & MATERIALS FOR USE IN SQUASH COURTS

The companies listed below have submitted systems, products and materials for inspection which the England Squash Technical Services Committee considers meet an acceptable standard. This list will be subject to occasional amendments and additions.

The England Squash Approved List is not exhaustive and it is possible that there are other systems, products, and materials, which could be equally satisfactory. For further information on any newly introduced products, you are recommended to contact the England Squash office.

#### COURT CONTRACTORS

##### **Specialists in fitting out traditionally built squash courts**

(i.e. wall surfacing, tin & board, out of court battens, floor installation, door & frame, glass back & side walls)

The companies listed below will liaise with the architect & builder regarding the background surface requirement prior to fitting out.
